

Wild Earth Top Dressing

With ABS

We Top Dress lawns with a thin layer of Wild Earth® premium finished compost.

Wild Earth® Top Dressing addresses some common lawn problems, including:

Bare spots, stress from drought or freezing temperatures. Prevents depletion of nutrients due to leaching, neglect, pets, or repeated use of chemical fertilizers.

Corrects compacted soil in high-traffic areas. Provides excellent water holding capabilities, slow release nutrients and supports important microbiology.

Establish a greener healthier lawn by restoring organic matter and incorporating ABS natural soil amendments.

Soil With A Mission

ABS Natural Ingredients:

Humate – nutrient core of compost in its purest form

North Sea Seaweed – provides nutrients and amino acids to boost root growth and uptake

ABS is backed by over 50 years of scientific research
